

Your request seeks information related to claims made for each of the last four financial years. For your information, not all action occurs within the financial years in which a claim is received. For example, a claim might be received in May (FY23/24) and not be accepted or disputed until July (FY24/25). In this instance the claim is recorded as FY23/24, and the dispute is recorded as FY24/25. The information is provided on this basis, as to provide the information linked to the claim date would again represent a significant and unreasonable amount of additional work.
